

ENVIRONMENTAL POLICY

- Nordic Bulk will contribute to an environmentally friendly and sustainable development by Improving our own processes and helping customers to achieve improvements by designing and producing machines and products to minimize their impact on the environment.
- We will achieve this by identifying our environmental aspects, implement preventive measures and ensure compliance and continuous improvement while simultaneously placing requirements on our selection of products and supplier of services.
- Our efforts to minimize our influence on the environment involves everyone in the company, and we will follow all relevant laws, regulations, and requirements.

Managing Director
Peder Egeland
